

PROFESSIONAL SUMMARY

Senior SAP Basis Technical Lead with 10+ years of hands-on SAP administration experience leading enterprise SAP landscapes including SAP S/4HANA, ECC, GRC, BW, and SAP Solution Manager. Proven expertise directing SAP Basis operations across hybrid and cloud-hosted environments, including SAP Business Technology Platform (BTP) and hyperscaler infrastructures. Strong background in implementing robust SAP security frameworks including role design, user lifecycle management, and Segregation of duties (SoD) compliance through SAP GRC Access Control. Solid experience in SAP HANA database administration, full SAP system lifecycle management (installations, upgrades, SUM, kernel patches, system refreshes), performance optimization, capacity planning, disaster recovery design, and high availability architectures. Experienced integrating on-premise SAP systems with SAP BTP using Cloud Connector and enabling secure communications through SSL, SNC, SSO, SAP Router, and certificates. SAP Certified Technology Associate and ITIL Certified.

CAREER HIGHLIGHTS

- Lead SAP Basis operations for enterprise SAP S/4HANA and ECC landscapes supporting mission-critical global business operations
- Provide senior-level technical leadership for SAP system stability, performance, and lifecycle governance
- Administer SAP Business Technology Platform (BTP), including subaccounts, entitlements, and Cloud Connector integrations
- Execute full SAP lifecycle activities including installations, upgrades, SUM migrations, kernel patching, transports, and system refreshes
- Drive HANA database performance optimization, memory management, SQL tuning, and system health monitoring
- SAP Security & GRC Governance Extensive experience implementing SAP security frameworks including role design, user lifecycle management, firefighter access, and SoD risk remediation on using SAP GRC Access Control.
- Design and test disaster recovery and high availability strategies aligned to RTO/RPO objectives
- Coordinate with cloud, infrastructure, security, and partners to ensure seamless hybrid SAP operations
- Maintain 99.9%+ system uptime through proactive monitoring, capacity planning, and root cause analysis
- Mentor and guide SAP Basis teams, promoting operational excellence and knowledge transfer

TECHNICAL SKILLS

SAP System Administration (S/4HANA, ECC, GRC, BW, Solution Manager)
SAP HANA Database Performance & Optimization
SAP System Installations (SWPM), Upgrades & Conversions (SUM)
Kernel Patches, Support Packs, HANA Revisions
System Refresh, Client Copy, Transport Management (TMS)
SAP ChaRM & Change Control Governance
SAP Business Technology Platform (BTP) – Subaccounts, Entitlements, Cloud Connector
SAP on Cloud Environments (including hyperscaler-hosted workloads)
Root Cause Analysis (DB / Application / Infrastructure)
SAP SLT & Real-Time Replication
AS ABAP and AS JAVA – ADS
User and Role management
Incident, Problem & Change Management
Security Controls & Compliance
Technical Leadership, Technology Roadmap development
SAP Basis Team Leadership & Mentorship
Incident & Problem Management (ITIL)
Knowledge of SOX, ISO 27000, GDPR
SAP HANA, MS SQL Server, Oracle, Sybase ASE
SUSE Linux, Red Hat Enterprise Linux, Windows Server

PROFESSIONAL EXPERIENCE

Fairfax Transactional Advisors, LLC

03/2020 – Present

Senior SAP System Administrator & Technical Lead

- Lead SAP Basis operations for enterprise SAP S/4HANA and ECC landscapes supporting mission-critical business operations.

- Provide technical leadership overseeing system stability, performance, lifecycle management, and cloud transformation initiatives.
- Architect and manage SAP system installations, upgrades, and migrations using SWPM and SUM, including full lifecycle planning and post-go-live stabilization.
- Coordinate with cloud, infrastructure, security, and external partners to ensure seamless SAP operations across hybrid environments.
- Administer SAP Business Technology Platform (BTP), including subaccounts, entitlements, and Cloud Connector integrations for secure hybrid connectivity.
- Support SAP systems hosted in cloud infrastructures, ensuring optimized performance, high availability, and resilience.
- Designed and supported SLT real-time data replication between ECC and S/4HANA.
- Execute kernel upgrades, HANA revisions, support packs, and transport governance across DEV, QA, and PROD systems.
- Lead HANA performance troubleshooting (memory management, CPU optimization, delta merge efficiency, SQL tuning).
- Lead SAP security administration, including user lifecycle management, access provisioning, access modification, and firefighter access governance.
- Design and maintain SAP roles and authorization on models aligned with security governance standards and business requirements.
- Partnered with cross-functional teams (HCM, FI/CO, SD, MM, PM) in the S/4HANA environment to design and implement Fiori Launchpad aligned business roles.
- Implement and maintain SSL, SNC, SSO, SAP Router, and Web Dispatcher configurations ensuring secure enterprise communication.
- Design and test disaster recovery and high availability strategies to meet RTO/RPO objectives.
- Maintain 99.9%+ uptime through proactive monitoring, capacity planning, and performance optimization.
- Maintain comprehensive, audit-ready documentation covering system configurations, interfaces, and operational procedures.
- Mentor and guide SAP Basis team members, promoting operational excellence and knowledge transfer.

Fairfax Technologies, LLC

03/2017 – 02/2020

SAP Consultant - System Basis & Solution Manager Consultant

- Managed SAP ECC, GRC, BW, and Solution Manager environments across global enterprise landscapes.
- Performed system upgrades, patching, kernel updates, and refresh activities ensuring compliance and stability.
- Implemented SAP Solution Manager monitoring, alerts, diagnostics, and ChaRM for centralized lifecycle management.
- Coordinated cross-functional teams (Infrastructure, Security, Functional, Development) during upgrade and migration cycles.
- Designed and executed backup/recovery and disaster recovery solutions for high-availability SAP systems.
- Led transport management governance and system refreshes for QA and sandbox environments.
- Conducted root cause analysis for performance and integration issues across application, database, and OS layers.

Ernst & Young

01/2011 – 02/2017

Senior Consultant - SAP Basis & Solution Manager Administrator

- Served as part of the technical team supporting SAP implementations and ongoing production operations across ECC ABAP and Java stack environments.
- Administered SAP NetWeaver ABAP & Java stacks including ADS integration.
- Executed SAP upgrades, kernel patching, and integration with third-party systems.
- Managed ITGC compliance initiatives for various clients supporting SOX and internal audit frameworks.
- Developed standardized operational procedures for refresh, backup, and recovery across distributed SAP environments.
- Supported large, multi-system enterprise SAP landscapes with performance tuning and cross-layer troubleshooting.

Ernst & Young

06/2009 – 12/2010

IT Consultant – SAP Controls & IT Audit

- Conducted SAP and Oracle ITGC reviews including access management, change control, and data integrity processes.
- Delivered SAP security governance frameworks through role-based access improvements and control enhancements aligned with SOX and ITGC standards.
- Delivered IT strategy and service management improvements across multiple enterprise engagements.

EDUCATION & CERTIFICATIONS

Bachelor's Degree in Computer Science

SAP Certified Technology Associate - System Administration (Oracle DB) with SAP NetWeaver and Certified ITIL Foundation
